MEGA - YACHT EQUIPMENT

MEGA - YACHT

Navalimpianti designs and manufactures Mega-yacht access, handling and maintenance systems since 1990. Our equipment is installed on some of the most luxury mega yacht sailing today.

The product line includes:

- Marina Pontoon
- Owner's balcony
- Shell platforms and doors
- Movable bulwark
- Tender and ski-jet cranes

Our Technical Departments design and coordinates projects using advanced technologies in order to obtain optimal solutions to satisfy Shipyards specific requirements.

Our equipments feature a particular care for finishing and may be fully integrated in ships design using 3D cad simulation. Mechanical accessories are always out of view.

Hydraulic and automation are fully integrated for easier and safer operations: equipment operation is assured by electro hydraulic control

system, including automation cabinets, hydraulic accessories, control stands and power packs available also in "Ultra silent" version. Automation may be completed with wireless control and/or vocal warning and alarm messages.

Full customer support and service offered by Navalimpianti includes:

- Feasibility studies
- Ship architectural integration
- Classification Societies Approval
- Logistic and prefabrication problem solving
- Installation
- Turn-key supply
- Yard survey during erection works
- Commissioning

MARINA' - TRANSOM PLATFORM

Navalimpianti Marina' and Transom platforms, fully customized according to the yacht design, are the smartest solutions for safely enjoying swimming, diving and fishing. Marina' and Transom Platforms concept is based on functionality and harmony:

- External surface flush with surrounding shell
- Flat interior surface
- Recess for automatic ladders or fixed stairs
- Hinged flaps flush with the deck
- Perimeter and bottom lighting system for night use
- Platform and flaps design ready for easy surface and wood finishing
- Mechanical accessories out of view
Platform scantling, approved by Classification Societies, is tailored to the specific Yard's requirements.

OWNER'S BALCONY

Navalimpianti Owner's balcony is the luxury solution to open up the interior of your cabin to the sea, for enjoying special events or creating a private access to the unique panorama in front of you.

Balcony design combines technology and easy operation with elegance and luxury details.

The external surfaces are flush with the surrounding shell; the interior can be finished in wood or other materials hiding all mechanical accessories out of view.

SHELL PLATFORMS & DOORS

Navalimpianti shell platforms and doors are designed and manufactured for various purposes, from the access to the car garage, jet-ski or motorboats recovery, loading and offloading of passengers and crew.

The original design includes the following key points:

- When closed, doors and platforms follow the hull shape;
- Particular care to the look of external/internal finishing and operating arms;
- Hidden machinery and mechanical devices.

In addition, special cranes may be integrated for the handling of different loads and vehicles.

Doors and platforms normally include the integral supporting frame for a simple “weld in” installation; in this case the supporting frame is tailored to the local aesthetic and strength requirements, deck thickness and

framing dimensions and they may be pre-fabricated and pre-tested in the factory.

MOVABLE BULWARKS

Navalimpianti Movable bulwarks are designed and manufactured for embarking and disembarking of jet-ski and tenders from upper decks. Rotation of bulwarks is realized by hydraulic actuators. Navalimpianti original design has the following strength points: external surface flush with vessel lines; interior surface ready for finishing according to yacht standards; top structure suitable for the application of wood handrails; mechanical accessories out of view.

TENDER & SKI-JETS CRANES

Navalimpianti Tender and jet-ski cranes are designed and manufactured to allow launching and recovering of jets and tenders. Telescopic hoisting arm system for the installation inside tenders and jets garage includes travelling beams and trolley, hoisting devices and electric or hydraulic equipments for translation.

Fixed guides may be ready to be installed under deck as well as suitable guiding system for electrical cables. Cranes may be supplied ready for the installation on board.
